

AZEVEDO NETO

Advogados

## WHO WE ARE

### ABOUT US:

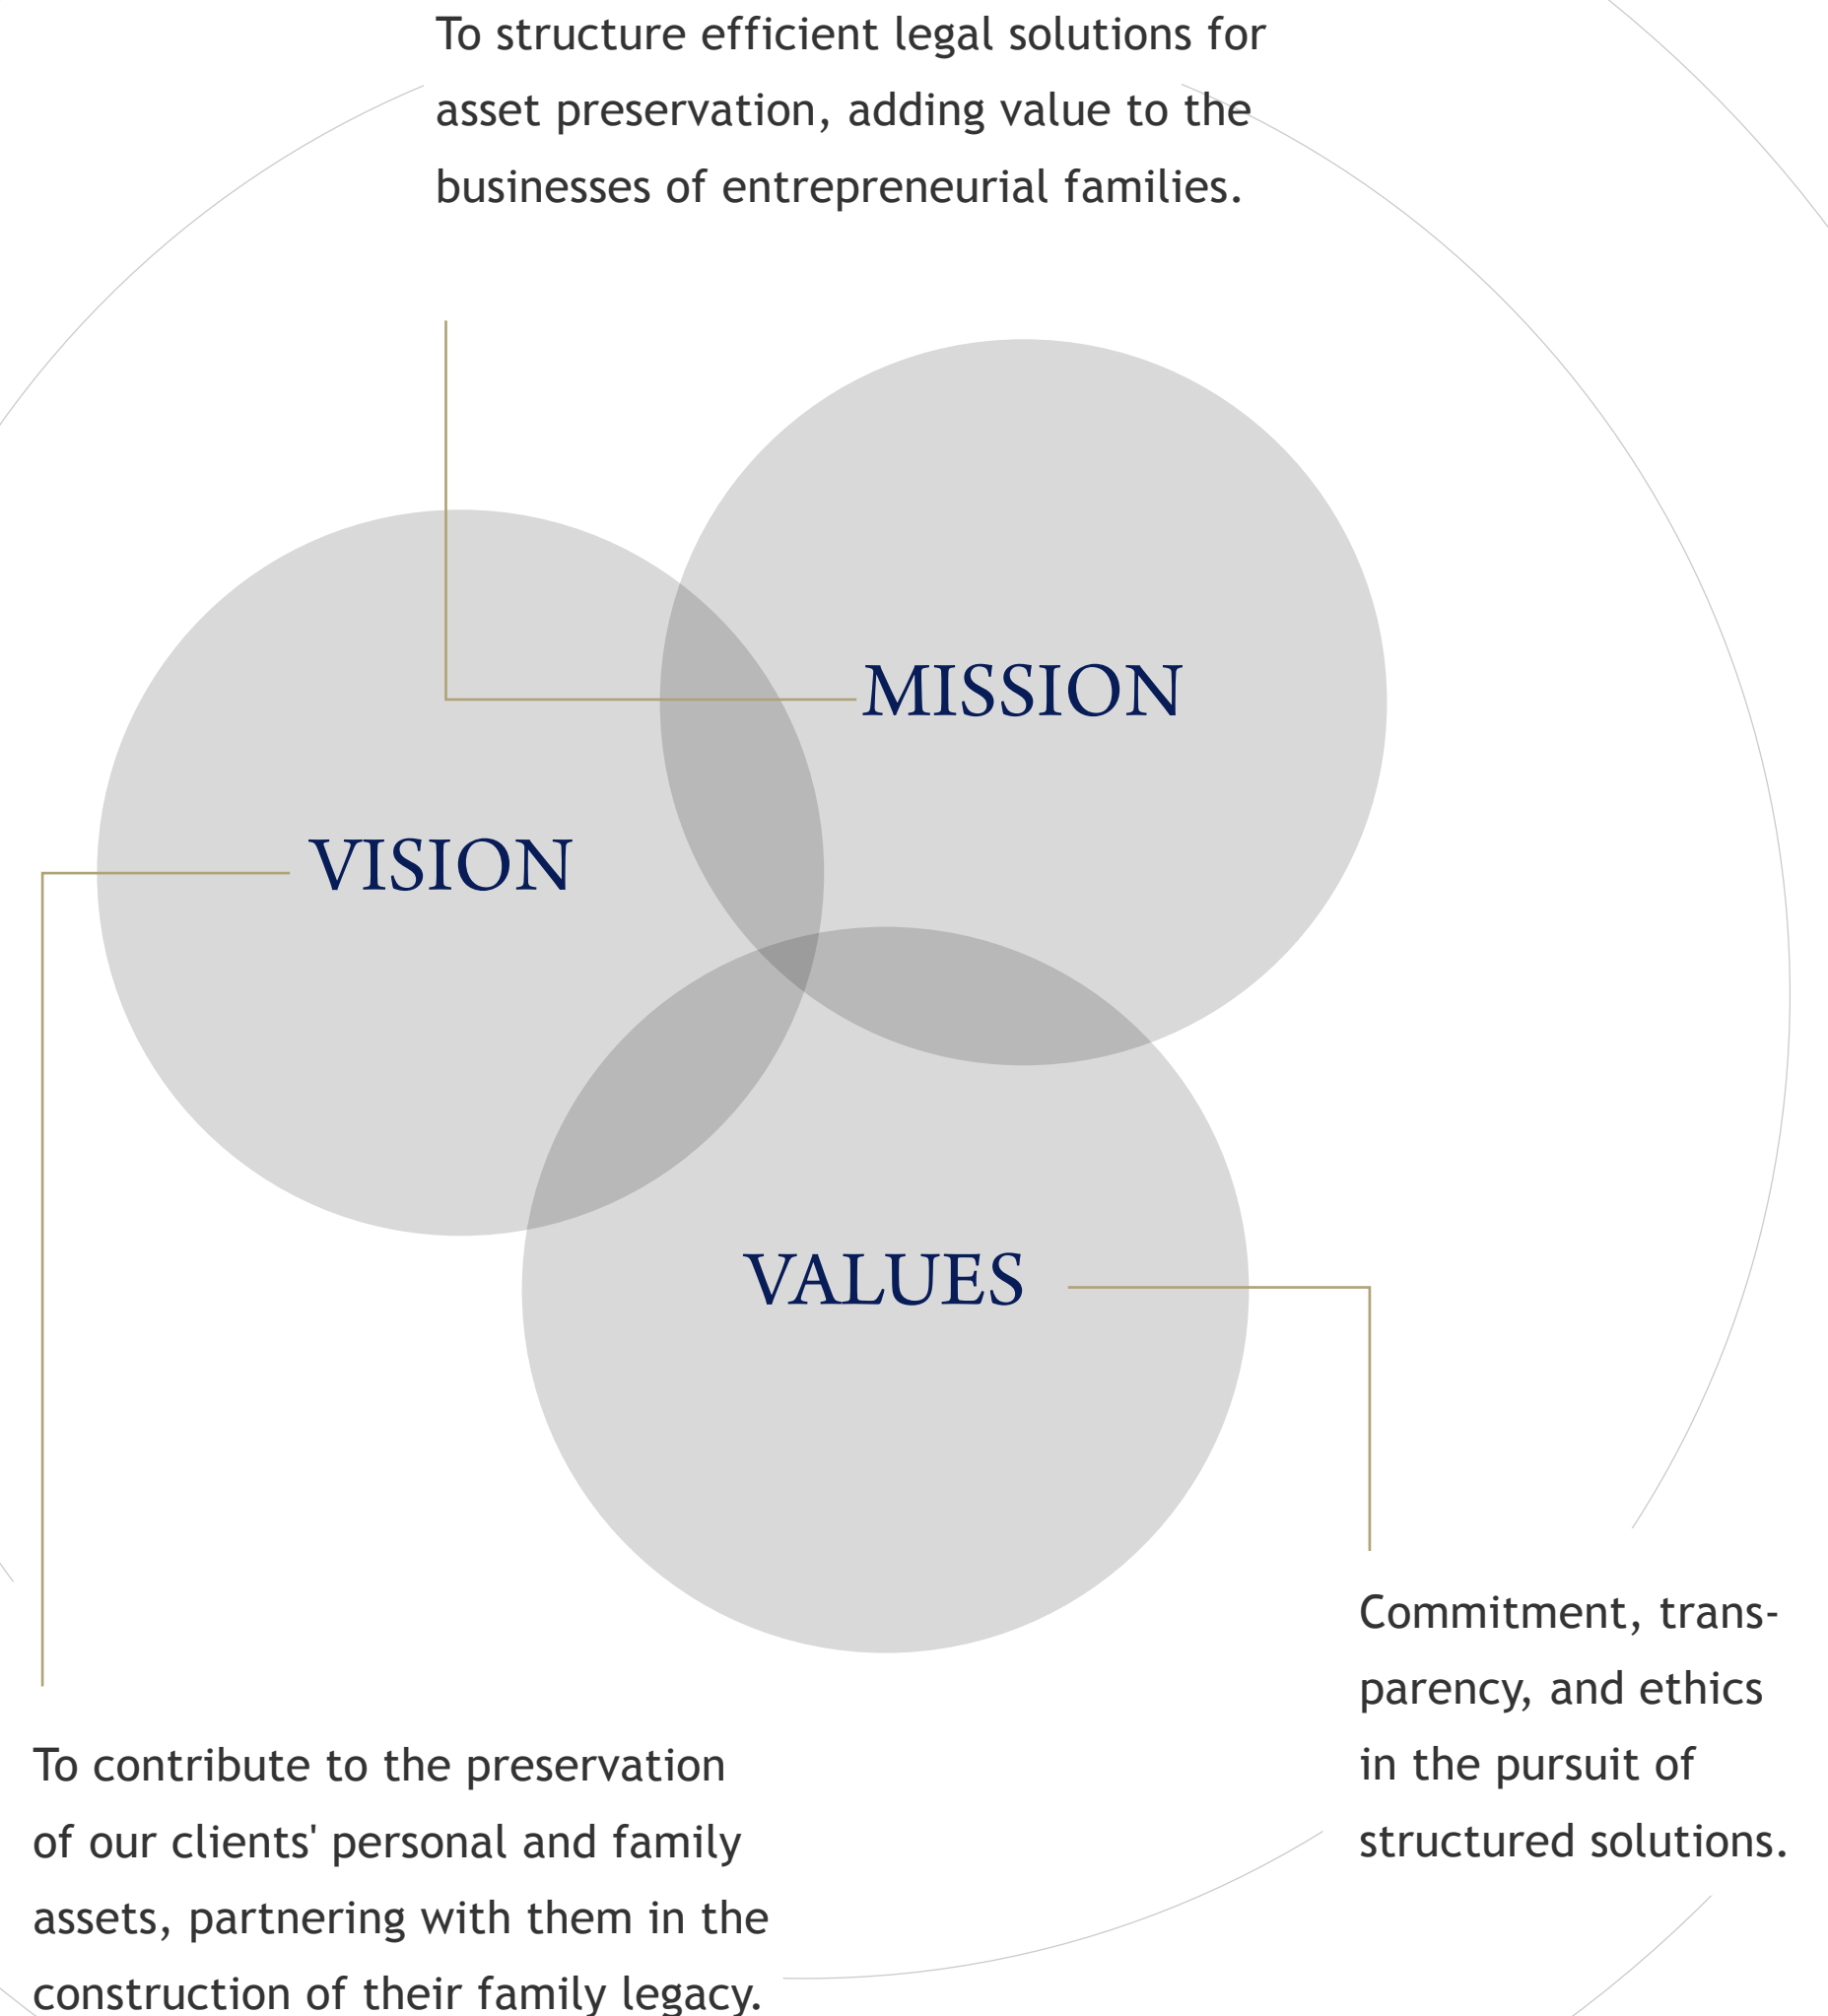

Since 2008, we've been structuring individualized solutions for the preservation of your assets by assessing the legal risks involved in your business and family affairs, thus contributing to the building of a family legacy.

### OUR TEAM:

Our team is formed by specialized professionals who work efficiently and with commitment to protect our clients' interests and assets.

### SOCIAL RESPONSIBILITY:

To give back to our society, we engage in pro bono work to ensure that those who lack resources have access to the judicial system.

## AREAS OF PRACTICE

We operate in various areas of law to meet the needs of our clients.

### RISK MANAGEMENT AND ASSET PRESERVATION

We work on identifying risks to personal and family assets, creating structured solutions for the protection of assets and the legacy to be passed on to future generations. This includes addressing taxes on real estate transactions (such as ITBI or ITCMD) and presenting solutions to avoid risks that could harm the assets, taking into consideration the specific characteristics of your business and family. We believe that prevention is the best way to preserve assets and enhance their growth.

### ENTREPRENEURSHIP WITH SECURITY

Entrepreneurship is a challenge in the Brazilian market, characterized by political and financial instability.

We assist our clients by acting both preventively litigation, minimizing risks, enhancing the chances of success, and contributing to the construction of personal wealth. From establishing legal entities, onboarding partners and investors, and managing contractual relations with suppliers and clients, to handling civil or labor-related legal actions, we proactively contribute to the growth of your business.

## SUCESSION STRATEGIC PLANNING

Azevedo Neto Advogados has extensive experience in succession strategic planning, which involves organizing the process of transferring family wealth and business to the next generation.

The benefits of succession strategic planning extend far beyond tax savings.

It offers an opportunity to consolidate the family legacy, professionalize business management, identify and prevent risks, and establish rules to preserve family harmony.

## CORPORATE STRATEGIC PLANNING

Considering the risks of entrepreneurship in Brazil, corporate strategic planning is an essential tool for protecting the personal assets of partners and investors.

Corporate strategic planning allows for the establishment of a structure that provides greater protection for personal assets, customized to the individualized interests and priorities of each entrepreneur.

The definition of the rights and obligations between partners and investors from the outset promotes harmony in relationships, preventing conflicts and asset dissipation.

Risk reduction can be combined with tax planning and succession strategic planning, offering even greater security and cost savings for the entrepreneur.

## CORPORATE DISPUTES

Sometimes, conflicts between partners and/or investors are unavoidable. Such disputes not only affect the directly involved parties but also impact the results of the legal entity.

We work on negotiating amicable solutions and initiating legal actions and arbitration procedures to defend our clients' interests.
